DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 17, 2006 has been entered.

Response to Amendment

2. Applicant's amendment filed on July 17, 2006 has been entered. Claims 21-28 have been amended. No claims have been canceled. No claims have been added. Claims 21-28, 30 and 31 are still pending in this application, with claims 21 and 28 being independent.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 21-28, 30 and 31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the

Art Unit: 2614

relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The Applicant's specification fails to describe performing a number identifier operation at a service switching point of a first carrier based on an originating number of a call without contacting a service control point to indicate whether or the originating numbers belongs to a predetermined set of originating numbers. What it does in specification is to determining if the dialed number belongs to predetermined set of numbers. Since the limitations in the claims are not supported by the specification, art rejection is not provided.

Response to Arguments

5. Applicant's arguments filed July 17, 2006 have been fully considered but they are not persuasive. Since the amended claims contain 112-1st paragraph issues, Examiner could not agree or disagree with Applicant's arguments.
